SUMMARY

A MERN Stack developer with 5 years of experience. Expertise in MongoDB, Express.js, React.js, and Node.js, honed skills in building cutting-edge web applications. Over the years, I have navigated the complexities of server-side development, constructed robust APIs, managed databases, and crafted dynamic and intuitive user interfaces on the client side. Proficiency in the MERN stack, coupled with my passion for staying abreast of the latest trends and advancements in web development, makes me an invaluable asset in creating seamless and innovative digital solutions

EXPERIENCE

PROJECTS

About Unilever

📅 01/2020 - 2021

A public domain website is a self-built platform providing essential company information. It consists of 12 pages, covering company history, leadership, policies, revenue, and share price.

News Centre

📅 01/2020 - 07/2021

A website is responsive, cross-platform, and accessible for the European market. It has five main sections: company news, press articles, new products, operations in various countries, and social impact. These sections are Global News, Trending News, News Series, Other News, and Multimedia (with embedded videos).

Policy Documentation

📅 03/2019 - 12/2019

This project involved creating a policy documentation system for the company. Admins can add, modify, and delete policies, with deleted policies being archived.

Quote Generator

📅 10/2018 - 03/2019

A global website for generating insurance quotes, used by company agents to create and email quotes based on user inputs, serving clients in over 200 countries with a wide range of insurance options from local brands.
